## ■ Profile

Junior Front-End Developer with solid knowledge of **HTML, CSS, JavaScript, and Bootstrap**.  
Passionate about creating responsive and interactive websites with focus on user-friendly design.  
Eager to start a professional career, improve technical expertise, and enhance English skills through practice and courses.

## ■ Skills

- HTML5, CSS3
- JavaScript (Core)
- Bootstrap
- Responsive Web Design
- Git & GitHub
- Local Storage, DOM Manipulation

## ■ Projects

**Coffee Shop Menu Website** – A working online menu with design, animations, and responsive layout.  
(Live on Vercel)

**CRUD App** – Application for data management (add, edit, delete, search) using JavaScript and Local Storage.

**Portfolio Website** – Personal website to showcase my projects.

■ All projects available on my Vercel Portfolio.

## ■ Education

Higher Institute for Management and Computer – Administrative Department

## ■ Languages

- Arabic: Native
- English: Beginner (willing to learn and improve through practice and courses)

## ■ Career Objective

Seeking a **Junior Front-End Developer** role in a software company or digital agency where I can apply my skills, contribute to real projects, and grow professionally.
